When you release the key, the dedicated inserted into the text. ALCATEL is a trademark of Alcatel-Lucent and is used under license © 2015 TCL TCL Ltd TCL Communication Ltd reserves the right to change the material or technical specification of Page 2 Safety and we encourage you to read this chapter carefully before using your phone. The manufacturer is not liable for any damage that may result in misuse or use contrary to the instructions contained in the present. Given that studies show that using a mobile phone while driving a vehicle poses a real risk, even if a loud kit is used (car kit, headset...), drivers are asked to refrain from using their mobile phone when the vehicle is not parked. While driving, do not use your phone or headphones to listen to music or radio. The use of headphones can be dangerous and prohibited in some areas. When turned on, the phone emits electromagnetic waves that can interfere with the car's electronic systems, such as ABS anti-block brakes or airbags. To make sure there are no problems - do not unplate the phone on top of the dashboard or in the airbag - contact the car dealer or car manufacturer to make sure that the dashboard is adequately protected from the rf energy mobile phone. It's a good idea to turn your phone off from time to time to optimize it. Turn off your phone before boarding the plane. Turn off your phone when you're in a health care room, except in designated areas. As with many other types of equipment currently in use as normal, mobile phones may interfere with other electrical or electronic devices or radio frequency equipment. Turn off your phone when you're near gas or flammable liquids. Strictly observe all signs and instructions placed at a fuel depot, gas station or chemical plant, or in any potentially explosive atmosphere. When the phone is on, it should be stored at least 15 cm from any medical device such as pacemaker, hearing aid or insulin pump, etc. To avoid hearing impairment, take a call before holding your phone to your ear. Also, move the phone away from the ear when using hand-free mode because the increased volume can cause hearing Do not allow children to use the phone and/or play with the phone and accessories unattended. When replacing the lid, note that your phone may contain substances that may cause an allergic reaction. Always treat your phone with care and keep it clean and dust-free Don't let your phone be exposed to adverse weather or environmental conditions humidity, rain, penetration of liquids, dust, sea air, etc.). The manufacturer's recommended operating temperature at temperatures with more than 55 degrees Celsius may be disturbed by the phone's intelligibility display, although this is temporary and unserious. Emergency phone numbers may not be achievable in all cellular networks. You should never rely solely on your phone for emergency calls. Do not open, dismantle or or to repair your mobile phone yourself. Don't drop, don't give up or bend your mobile phone. Do not use your phone if the glass is made by a screen, damaged, cracked or broken to avoid any injuries. Use only batteries, chargers and accessories, which are recommended by TCL Communication Ltd and its affiliates and are compatible with the phone model. TCL Communication Ltd and its affiliates will not be liable for damage caused by the use of other chargers or batteries. Don't forget to back up or keep a written record of all the important information stored in your phone. Some people may suffer epileptic seizures or blackouts when exposed to flashing lights. These seizures or blackouts can occur even if the person has never had a previous seizure or blackout. If you have experienced cramps or blackouts, or if you have a family history of such incidents, please consult your doctor before turning on the flashing feature on your phone. Parents should keep an eye on their children's use of video games or other features that include flashing lights on their phones. All people should stop using and consult a doctor if any of the following symptoms occur: cramps, eye or muscle twitching, loss of awareness, involuntary movement, or disorientation. To limit the likelihood of such symptoms, please take the following precautions: - Do not play or use the blinking function, if you are tired or needing sleep.- Take a minimum 15-minute hour break.- Play in a room in which all the lights are on.- Play at the furthest distance from the screen.- If your hands, wrists, or hands get tired or sore while playing, stop and rest for hours before playing again.- If you continue to have pain in your hands, wrists or hands during or after the game, stop the game and doctor. When you play games on your phone, you may experience casual discomfort in your arms, arms, shoulders, neck or other parts of your body. Follow the instructions to avoid problems such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorders. Please note that you must abide by the laws and regulations in effect in your jurisdiction or other jurisdiction (s) where you will use your mobile phone regarding photographing and recording sounds from your mobile phone. Under such laws and regulations, it may be strictly prohibited to photograph and/or record the voices of others or any of their personal qualities, as well as to duplicate or disseminate them, as this may be considered an invasion of privacy. The user is fully responsible for obtaining prior permission to record personal or confidential conversations or photographing another if necessary The manufacturer, seller or seller of your mobile phone (including the operator) is not liable as a result of misuse of your mobile phone. Before removing the battery from your phone, please make sure that The following precautions for battery use: - Do not try to open the battery (due to the risk of toxic fumes and - Do not puncture, disassemble or cause a short circuit in the battery.- Do not burn or dispose of the used battery in household garbage or store it at temperatures above 60 degrees Celsius. Use the battery only for the purposes for which it was designed. Never use damaged batteries or those that are not recommended by TCL Communication Ltd and/or its affiliates. This symbol on your phone, battery and accessories means that these products must be delivered to collection points at - Municipal Waste Disposal Centers with specific bins for them - collecting bins at points of sale. so that their components can be reused. In the European Union: These collection points are free. All products with this sign must be delivered to these collection points. In jurisdictions not in European unions: Equipment with this symbol should not be thrown into conventional bunkers if your jurisdiction or region has the right means to recycle and collect; instead, they should be taken to collection points to be processed. WARNING: THE RISK OF EXPLOSION IF THE BATTERY IS REPLACED BY THE WRONG TYPE. DISPOSE OF BATTERIES USED AT TO Mains, operating chargers will operate within the temperature range: Chargers designed for your mobile phone meet the standard of security of information technology equipment and office equipment. They also comply with the 2009/125/EC Eco-Indian Directive. Because of the various applicable electrical specifications, the charger you purchased in one jurisdiction may not operate in another jurisdiction. They should be used for because of the material used enclosure, the mobile phone should only be connected to the INTERFACE USB version 2.0 or higher. Connection to the so-called power USB is prohibited. The adapter should be installed next to the equipment and should be easily accessible. This charger is only for internal use. Proof of compliance with international standards (ICNIRP) or the European Directive 1999/5/EC (RETE) is required from all models of mobile phones before they can be put on the market. Protecting health and safety for the user and any other person is an important requirement of these standards or this directive. THIS DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits of exposure to radio waves (radiofrequency electromagnetic fields) recommended by international guidelines. The guidelines were independent scientific organization (ICNIRP) and include a significant margin of safety designed to ensure the safety of all people, regardless of age or health. Radio wave exposure guidelines use a unit of measurement as a specific absorption factor, or SAR. The SAR limit for mobile devices Tests for SAR are conducted using standard operating positions with a device that transmits at the highest certified level of power in all tested frequency ranges. The highest SAR values in accordance with ICNIRP guidelines for maximum SAR for this model and the conditions under which it is the head of the SAR GSM900 0.686 W/kgBody-worn SAR GSM900 0.360 W/kgDuring use, the actual SAR values for this device are usually well below the values stated above. This is because for the purpose of system efficiency and minimizing interference in the network, the operating power of your mobile device is automatically reduced when full power is not required for a call. The lower the power of the device, the lower its SAR value. Body-worn SAR tests were conducted at a distance of 1.0 cm. To meet the recommendations for RF exposure during body wear surgery, the device must be at least this distance from the body. If you do not use an approved accessory make sure that any product used does not contain metal and that it positions the phone's specified distance from the body. Organizations such as the World Health Organization and the U.S. Food and Drug Administration have said that if people are concerned and want to reduce their exposure, they can use a hands-free device to keep the phone away from the head and body during phone calls, or reduce the amount for more information, you can go to www.alcatelonetouch.comAdditional information about electromagnetic fields and public health available on the following website: phone is equipped with a built-in. To make the best work, you should avoid touching it or degrading it. Because mobile devices offer a wide range of features, they can be used in positions not against your ear. In these circumstances, the device will comply with the guidelines when using a headset or usb data cable. If you use another accessory make sure that any product used does not contain metal and that it positions the phone at least 1.0 cm from the following statements and notifications apply in specific regions as noted. General information : www.alcatelonetouch.com Hotline Number: see TCL Communications Flyer or Address: Number 1910-12A, Tower 3, China HK City, 33 Canton Road, Tsimshatsui, Kowloon, Hong KongOn our website, you will find our frequently asked questions (frequently asked questions) section. You can also contact us by email to ask any questions you e-version of this user manual is available in English and other languages depending on availability on our server: your is a transceiver that operates on the GSM 850/900/1800/1900 This equipment meets the basic requirements and other relevant provisions of the 1999/5/EC Directive. The entire copy of the Declaration of Compliance for your phone can be obtained on our website: The phone is identified by IMEI (serial phone number) shown on the packaging label and in the phone's memory. We recommend that you check the number when you first use your phone by dialing number 0 6 and keeping it in a safe place. It can be requested by the police or your operator if your phone is stolen. This number allows you to lock your mobile phone without allowing a third party to use it, even with another SIM card. Contact the network operator to check the availability of services. There may be some differences between the description of the user's manual and the work of the phone, depending on your phone's software or the specific services of the operator.
